Learn about water Resource for schools

The following free resources provides an engaging introduction to the water cycle, river catchments, water quality, water services and how to protect water.

Suitable for
senior primary
and secondary
students to watch,
discuss, explore
and learn.

Learn about water in only 5 lessons

1 Learn about the water cycle

Introduction to the Water Cycle with a short cloze activity at the end of this PDF.

www.thewaterforum.ie/publications/water-cycle-cloze-activity

2 Learn about river catchments

Rivers flow from source to sea and we all live in a river catchment. Find out more, in this short-animated video.

www.vimeo.com/456880739

Discussion point: Where is your local river? Can you find it on www.catchments.ie?

3 Learn about water quality

This **good ecological status** video from catchments.ie explains what the 'good ecological status of water' means and why it is important.

www.catchments.ie/good-ecological-status-matter

Discussion point: How do I impact on water? Find out about your local river water quality at catchments.ie/maps.

Ecological Wonder of Water The bugs that live in water indicate how clean it is, learn more in this short video.

www.youtube.com/watch?v=DphFA-i27XY

Discussion point: Food chains in rivers and streams.

4 Learn about water services

The Story of Water is a 45 minute video from Irish Water telling how water services is provided in Ireland.

www.water.ie/about/storyofwater

Discussion point: Where does the water in your school or home come from and who provides it?

5 Learn what we can do to protect water

Water Matters at Home is a short-animated video (3 minutes) telling how we are connected to water, how we impact it and how we can protect it.

www.youtube.com/watch?v=Vu-QNR6Zp1s

Discussion point: List some easy actions everyone can take to protect water and biodiversity.
